About EdTech Tulna :The rapidly growing Indian EdTech landscape has resulted in an overwhelming choice of EdTech solutions for decision-makers such as governments, schools, investors, parents, and teachers. In the absence of information about the quality of products in the market, adopters are compelled to make ad-hoc decisions based on little or no evidence of a product's effectiveness. Hence, there is an acute need today for credible and accepted standards on the quality of EdTech products to simplify the decision-making process in a systematic manner. EdTech Tulna is an EdTech evaluation index for quality of product design developed as a public good. Created with the objective of catalysing information-led decision-making by EdTech adopters and encouraging quality-aligned supply in the ecosystem, it is a one-of-a-kind initiative with wide applicability in the Indian and global context. Over the last two years, Tulna has been received positively by both the product ecosystem and institutional adopters like the state and central government bodies. Tulna is set on a high growth trajectory to set an evidence-led agenda in the EdTech ecosystem in India and globally.

Position Summary: The Project Director of EdTech Tulna Project will strategically drive this initiative to bring system-level change in the EdTech ecosystem with support from critical stakeholders including senior government officials, leading academicians, product developers, international and domestic philanthropies/NGOs.

Title of the Project	EdTech Tulna: Awareness, Engagement and Empowerment of Public and Institutions for Adoption of Education Technology Products (RP04504N)	
Funding Agency	Central Square Foundation	
Name of the Project Investigator	Prof. Mahim Sagar [email ID:tulna.iitd.csf@gmail.com]
