Project Assistant-I

One position — field & lab-based research role

Applications are invited on plain paper for a Project Assistant-I position in an SERB-sponsored project, “Investigation of stress physiology and changes in grain fatty acid composition in *Brassica juncea* against fluoride toxicity.”

SALARY	POSITIONS	DURATION
₹37,000 + 30% HRA (with NET/GATE)	01	~20 months, co-terminus with project

ESSENTIAL QUALIFICATION

- M.Sc. in Environmental Science, Botany, Chemical Science, Earth Sciences, or equivalent, with a good academic record and experience in environmental fieldwork or soil, water, and plant sample analysis.

DESIRABLE QUALIFICATION

Experience with soil anion/cation analysis via IC, physicochemical properties of soil and water, and fatty acid analysis of plant samples via GC would be preferred, in addition to the

essential qualification. Candidates unwilling to perform field collection of samples from agricultural fields in the NCR should not apply.

NATURE OF THE ROLE

The position involves sampling and analysis of plant, soil, and water samples from the NCR and adjoining states, using analytical techniques, field observations, and basic statistical tools, leading to publications. It is purely temporary and subject to fund availability; unsatisfactory progress may lead to termination at any time.

HOW TO APPLY

- 1 Send a duly signed application — cover letter, detailed CV, and details of educational/research accomplishments — in a closed envelope, by hand, post, or email, within Last Date - 14 Aug 2026.
- 2 Clearly mention name, date of birth, contact details, qualifications, and experience in the CV.
- 3 Shortlisted candidates will be informed by email of the interview date/time/location.
- 4 No TA/DA will be paid for in-person interaction.
